At Ubisoft Mainz, we are currently looking for a talented Engine Programmer to join the amazing Team behind Rainbow Six Siege. In this role you will share responsibility for developing and maintaining low-level systems and overall architecture. You will be working on multiple platforms and in areas such as memory management, loading, streaming, physics, audio and platform specific systems. You will be working as part of our feature teams, including but not limited to technical health improvements, quality of life improvements and monetization features.

The main and routine tasks of the Engine Programmer are to:

- Work with precision and care on our live systems and frameworks
 - Provide the technical foundation for features
 - Maintain and extend the existing engine and frameworks, safeguarding and improving stability
 - Work on identifying and improving existing systems and identify new opportunities
 - Analyze, support and improve the performance of our features
 - Work on the architecture of our features, keeping long-term maintainability and scalability in mind
 - Work with the lead team on improving game stability and service reliability
-
- Bachelor or Master degree in computer science or any other relevant discipline
 - 3+ years of professional experience (at least one released title)
 - Strong skills in C++
 - Strong ability for analyzing and extending existing code
 - Good communication skills
 - Self-direction and motivation
 - Fluent in English
 - Ability and desire to work as a team player

Your benefits:

- Flexible working hours
- External training, education in our in-house guilds and knowledge sharing with other teams
- Fresh fruits, discounted gym membership and support for child care
- Free bike rental or lease your own bike
- Working in an innovative and international company

We offer a highly interesting challenge for a team player including the possibility to show personal initiative. If you are passionate about video games and would like to work with like-minded professionals in an international team, please apply via our career portal. The application should include your resume, a cover letter including your earliest starting date, your salary expectations and why you would like to join us.
