As a Frontend Web Developer within the Ubisoft Connect Mobile team, you'll help implement the latest features in our React web applications and our React Native mobile application.

Because we use GraphQL for the app's data and state management needs, your tasks will range from front-end based UI development and debugging to building and maintaining the GraphQL server itself.

You'll liaise with our game designers and UX designers to deliver the best experience to our users and collaborate with our in-house testing team to shake out any bugs.

You'll research and suggest new approaches as tech problems pop up and stay on the lookout for ways to improve our methods.

Plus, you'll support and coach other team members as needed, including those in different time zones (we are a multinational team, after all!).

What you'll do, more specifically

We use agile methodology, so you'll kick-off a typical day with a quick team discussion to outline goals and check up on everyone's progress.

Given that we're a multinational team, we make use of plenty of tools to stay in touch and organize our time to meet at reasonable times. Once everyone is up to speed, the devs get to work on their assignments.

Then, it'll all depend on the day. Sometimes there'll be pair programming or an in-depth thread about how to approach a problem. (Often, there'll be a strategically placed cat meme.) Most of the time, though, you'll work closely with your colleagues to fix and build – because, well, that's what we do.

- A degree in Computer Science or Software Engineering (or related training)
- In-depth knowledge of JavaScript (ES6/2015+), TypeScript and React (and similar modern

libraries/frameworks)
- Experience building mobile web apps, preferably with React Native
- Experience with RESTful API consumption, caching, and error handling
- Experience with Git, pull requests, and CI/CD workflows
- Experience with GraphQL (or a strong willingness to learn)
- A passion for clean architecture and future-proof code + a desire to stay up to date in web tech
- A collaborative and innovative spirit

Nice to have:

- Experience with a client state manager, like Apollo Client
- Experience with automated testing frameworks such as Jest
- Experience with profiling and optimizing your creations
- Experience with native mobile development (either native projects or writing plugins for React Native)

Your benefits:

- Relocation Support
- 26 days paid vacation per year. Additionally, you will get half a day off on Christmas Eve and New Year's Eve and approximately 11 bank holidays
- Company Pension Scheme.
- Opportunities for growth on your desired career path: Leadership training, workshops, guest speakers from the industry, online Ubisoft learning platform, coaches, Experts and library.
- Up to 350€ childcare support per child per month.
- Discounted Games.
- Gym Subsidy. We contribute 50% (up to a maximum amount of 25€) towards the monthly cost of a gym membership of your choice.
- Monthly Mobility Budget. 80€
- Our Ubisoft Blue Byte Academy offers multiple opportunities for you to discover your full potential and develop yourself in various areas.
- English and German classes for free. Main language in the studio is English.

We offer a highly motivating challenge for team
players interested in showing personal initiative in an innovative and international company.
If you are passionate about video games and would like to join an industry leader -
please apply via our career portal.
