As our new Gameplay Programmer you will be focused on camera, control, character (3C) and Animation.

As a part of our gameplay team you will be implementing gameplay features for the Avatar Project on PC and Console in C++ using our Snowdrop game engine.

You will make heavy use of 3Cs concepts to implement and maintain a variety of gameplay mechanics and improve existing features, collaborating closely with designers and artists.

- Design, implement and maintain 3Cs and gameplay systems together with game designers for a AAA game on PC & console.
- Ensure that newly developed features and systems meet expectations and are coherent with existing code and architecture.
- Liaise with animators in creating dynamic code systems interacting directly with high fidelity animations.
- Development of features within a multi-threaded environment.
- Implement and optimise controls and systems in C++ with game designers to ensure responsive playability.
- Analyse and understand game design to define requirements for features and game systems to be developed.
- Utilise complex animation systems to increase realisation and push understanding to players.
- Identify and resolve bugs identified by people from other disciplines, the quality control team, and your peers.

Our new team member would have a high degree of self-motivation and initiative. You'll be able to communicate well and have a keen eye for characters, controls and Camera.

As a passionate and valued gameplay programmer on the team you will be positive and forward thinking and be able to anticipate the needs of your project.

- Master or Bachelor's in computer science or engineering (or equivalent experience)
- Strong programming skills in C++.

- Proficient in refactoring and optimising existing systems.
- Good debugging and problem-solving skills.
- Understanding of multi-threaded principles.
- Experience in development with Console SDKs (PS4 and Xbox)
- Knowledge of game development using interactive animation systems.
- Ability to work efficiently with a large, existing code base.
- Excellent communication skills and ability to work in a team.
- Comfortable planning tasks and dependencies.
